BT7057

Ø50MM POLE END RING USE WITH A BT7850 POLE

ASSEMBLY INSTRUCTIONS

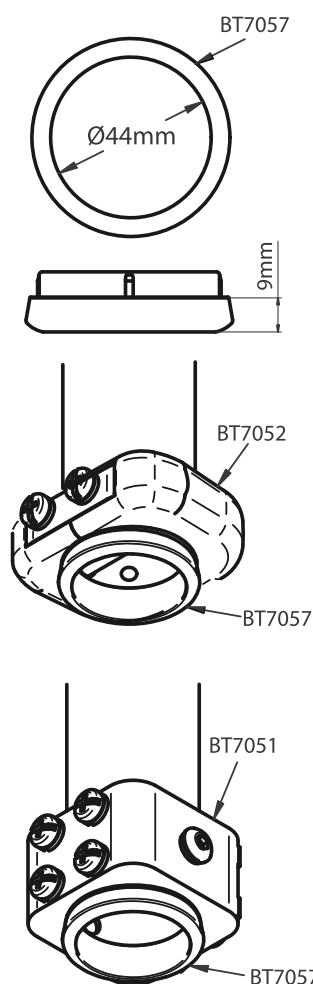

The BT7057 pole end ring creates a neat appearance at either end of any B-Tech BT7850 (Ø50mm) pole. The ring is quickly and easily fitted by means of a tight and secure push fit. This ring also doubles up as a cable protector against the rough edge of hand sawn poles upon cutting to length during installation.

The Pole End Ring has a diameter 44mm hole to allow most cables and connectors to easily pass through.

The Pole End Ring fits onto a B-Tech 50mm (2") pole even when a BT7052 collar, including covers, is attached and with the safety bolt in place.

To use the larger BT7051 collar, new safety bolt holes must be drilled at least 27mm from the end of the pole to allow the Pole End Ring to fit on.
